

BILLVYAPP

User Manual

For Managers & Admins

The Starr Kuts

Salon billing, customers, appointments & operations

This guide explains how to sign in, navigate the app, and complete everyday tasks such as walk-in billing, customer management, expenses, services, inventory, and revenue reports.

Document date: 05 August 2026

Audience: Salon Manager | Salon Admin

Tip

Keep this PDF handy during training. Most screens are reached from the left sidebar. Menus you see depend on whether you signed in as Manager or Admin.

Contents

1. Getting started (login & session)
2. Who sees what (Manager vs Admin)
3. Navigation map
4. Dashboard
5. Walk-in Billing (Manager)
6. Appointments (Manager)
7. Customers
8. Services & bulk upload
9. Expenses
10. Revenue Report (Admin)
11. Inventory
12. Notifications, Profile & Help
13. Quick day-one checklists
14. Troubleshooting

1. Getting started

Sign in

1. Open the application login page.
2. Enter your email or mobile number, and your password.
3. Submit. You will usually receive a 6-digit OTP on your registered phone.
4. Enter the OTP. You can request a new code after about 60 seconds.
5. On success you land on the Dashboard (or the page you were trying to open).

Forgot password?

Use Forgot password on the login screen. Follow the email link (valid for about 1 hour) to set a new password, then sign in again.

Session & security

- Your session is restored automatically when you refresh the browser.
- If your session expires, you are asked to sign in again. Use the same login + OTP flow.
- Sign out from your profile menu when you leave a shared computer.
- Never share your OTP or password with anyone.

2. Who sees what

BillVyapp shows different menus for Manager and Admin so each role focuses on the right work.

Area	Manager	Admin
Dashboard	Operations view (schedule, floor, stock alerts)	Revenue & franchise overview
Billing (Walk-in)	Yes	No (redirects to Dashboard)
Appointments	Yes	No
Customers	Yes	Yes
Services	Yes (add / categories / bulk upload)	Yes (mostly view)
Expenses	Yes (create; request delete)	Yes (create; approve/reject delete)
Revenue Report	No	Yes
Inventory	Yes (incl. Direct Bill)	Yes (view / manage stock)
Notifications / Profile / Help	Yes	Yes

Note

A separate Super Admin console exists for platform staff. Salon Managers and Admins do not use it.

3. Navigation map

Use the left sidebar. Items marked * appear only for that role.

Menu	Purpose
Dashboard	Today's snapshot and shortcuts
Billing *Manager	Walk-in checkout: services, customer, pay
Appointments *Manager	Bookings, walk-ins list, new appointments
Customers	Customer list, filters, loyalty, history
Services	Service catalog, packages, coupons
Revenue Report *Admin	Sales receipts, refunds, pending, advances
Expenses	Log and track salon expenses
Inventory	Stock, vendors, orders, movement log

Also available from the profile / bell menu

- Notifications - alerts for appointments, payments, inventory, system
- My Profile - your name, contact, role, salon
- Help & Support - FAQs and contact options
- Sign Out

4. Dashboard

Manager dashboard

Focuses on floor operations for today.

- Quick Actions: New Walk-in, New Appointment, Add Customer, View Schedule
- KPIs: today's appointments, walk-ins, on the floor, pending bills, new customers, satisfaction, stock alerts
- Panels: today's schedule, floor status, low stock, recent feedback, critical alerts

Admin dashboard

Focuses on revenue and franchise/shop oversight.

- Revenue KPIs and weekly charts / top services
- Franchise / shop panel: shop details and creating manager accounts for shops
- Today's schedule and critical alerts

5. Walk-in Billing (Manager)

Path: Sidebar -> Billing. Complete three columns in order: Services -> Customer -> Bill.

Step A - Services

1. Search and select one or more services from the catalog.
2. Adjust quantities if needed. At least one service is required to continue.

Step B - Customer

1. Enter the customer's 10-digit mobile number (+91). The app looks up existing customers automatically.
2. If found: name and gender are filled; membership tier may show as a badge.
3. If new: enter full name and select gender (Male / Female / Other).
4. Optional: enter Stylist name (saved with the visit).

Step C - Bill & pay

1. Review the bill summary and duration estimate.
2. Apply coupon, loyalty redeem, or % / flat discount (with reason) if needed.
3. Choose payment method: Cash, Card, or UPI.
4. Tap Pay to complete checkout, or Confirm without pay to leave a pending balance.

After payment

- A success receipt appears. You can share via SMS or WhatsApp.
- Star rating (1-5) is optional. Tap Done with or without selecting stars.
- You return to continue the next bill / dashboard as configured.

Best practice

Always confirm the mobile number before charging. Existing customers keep history, loyalty, and membership pricing tied to that number.

6. Appointments (Manager)

Path: Sidebar -> Appointments.

- View the schedule / list for the selected date.
- Filter appointment vs walk-in types when needed.
- Update status (for example checked-in, completed, no-show) as your floor process requires.
- Checkout an appointment into billing when the guest is ready to pay.

New Appointment

1. Open New Appointment from Dashboard quick action or Appointments.
2. Select an existing customer or create a new / walk-in customer.
3. Choose date, time, and services (packages/products if offered).
4. Confirm the booking.

7. Customers

Path: Sidebar -> Customers. Shared by Manager and Admin.

Add a customer

1. Click Add Customer.
2. Enter required Name and Phone. Optionally add email, gender, birthday, address, notes.
3. Save - the customer profile opens.

Search & filters

Use search for name, phone, or email. Combine filters to build follow-up lists:

Filter	What it does
Tier	Filter by membership / loyalty tier
Status	Active or inactive customers
Gender	Male / Female / Other
Source	Walk-in or online (as recorded)
Birthday	Today or this month
Inactive	No visit for 7+ / 30+ / 60+ / 90+ days
Last visit	Date range (from - to)

Use Clear to reset all filters. The counter shows how many customers match.

Customer profile actions

- Edit details; activate or deactivate
- View visit history
- Loyalty: view points, redeem, buy or upgrade tier
- Messaging helpers and feedback links where available

8. Services & bulk upload

Path: Sidebar -> Services. Tabs: Services | Packages | Coupons.

- Search and filter by gender, category, and status.
- Managers can add services, manage categories, and run bulk Excel upload.
- Admins can review the catalog; add/bulk controls are primarily for Managers.

Bulk upload (Manager)

1. Open Bulk Upload and download the Excel template.
2. Fill rows using the column names exactly as in the template.
3. Upload .xlsx / .xls / .csv and review the preview (valid / warnings / errors).
4. Click Import once. A progress bar shows status - do not click Import repeatedly.
5. When finished, review Added / Updated / Skipped counts.

Typical template columns

Column	Required?	Notes
service_name	Yes	Display name of the service
category	Yes	Must match an existing category name
price	Yes	Walk-in / list price (INR)
member_price	Yes	Member price
duration_minutes	Yes	Service duration
description	No	Optional details
sku_code / service_code	No	Stable code for updates on re-import
gender / tax / status / group	No	If present in your template version

Important

Bulk upload updates matching services and creates new ones. It does not delete your existing catalog.

9. Expenses

Path: Sidebar -> Expenses. Available to Manager and Admin.

Add an expense

1. Click Add expense. (Disabled if the business day is closed - list becomes read-only.)
2. Fill Date, Category (Operational / Inventory / Payroll / Transfer), Sub-category, Amount.
3. Choose Source: Cash, UPI, or Card.
4. Enter a Note - required for every expense.
5. Save. Totals and filters update immediately.

Filters

- Search note, sub-category, or employee text
- Date from - to
- Category chips and Source chips (Cash / UPI / Card)
- Status: Normal / Pending delete / Rejected delete
- Clear resets all filters; count and total amount update live

Delete workflow

Manager

- Deleting an expense sends a delete request to Admin (toast: requested).
- While pending, the row shows pending status. You can cancel the request if the UI offers it.
- If Admin rejects, you will see Rejected by admin.

Admin

- Pending delete requests show Approve and Reject actions.
- Approve permanently removes the expense.
- Reject keeps the expense and marks it rejected for the Manager.

Day closed

When the day is closed, expenses are read-only. Open the next business day before adding or changing entries.

10. Revenue Report (Admin)

Path: Sidebar -> Revenue Report. Managers are redirected away from this area.

Work inside the receipts tabs:

Tab	What you do
Sales	Browse completed receipts / sales ledger
Refunds	Review pending refunds; approve (PIN) or reject
Pending Payments	Collect outstanding balances; send reminders
Advance Payments	Track customer advances
Membership / Packages	See enrollments (active / exhausted / expired)

Refunds

Approving a refund may require your approval PIN. Keep that PIN confidential and use it only when verifying a valid refund request.

11. Inventory

Path: Sidebar -> Inventory. Tabs: Stock | Vendors | Orders | Log.

- Monitor total products, low / out of stock, stock value, and pending orders.
- Stock tab: review quantities and adjust / reorder as your process allows.
- Vendors and Orders: supplier records and purchase orders.
- Log: movement history for audits.
- Managers may see a Direct Bill shortcut for related billing flows.

12. Notifications, Profile & Help

Notifications

- Open from the bell icon or profile menu.
- Categories can include warnings, appointments, payments, inventory, success, and system.
- Mark items read, mark all read, or dismiss as needed. Click an item to jump to related work when linked.

My Profile

- Confirm your name, email, phone, role, and salon identity.
- Use Sign Out when finished on a shared device.

Help & Support

- Browse FAQs and contact channels listed in the app.
- Platform support reference: support channels shown in-app / BillVyapp branding.

13. Quick day-one checklists

Manager - open the day

1. Sign in with OTP.
2. Check Dashboard: schedule, floor, stock alerts.
3. Bill walk-ins from Billing as guests arrive.
4. Log expenses with note + payment source.
5. Follow up inactive customers from Customers filters.

Manager - bill a walk-in (summary)

Billing -> Services -> Mobile lookup / create customer (+ optional stylist) -> Cash/Card/UPI Pay -> optional stars -> Done.

Admin - review the business

1. Sign in with OTP.
2. Check Dashboard revenue KPIs and franchise/shop panel.
3. Open Revenue Report: Sales, Pending, Refunds.
4. Open Expenses: approve or reject pending delete requests.
5. Spot-check Customers and Inventory.

14. Troubleshooting

Problem	What to try
Cannot open Billing / Appointments	Confirm you are signed in as Manager.
Cannot open Revenue Report	Confirm you are signed in as Admin.
Login OTP not arriving	Wait for cooldown, check phone number, then Resend. Contact Admin if stuck.
Session expired / Unauthorized	Sign out, sign in again with OTP.
Expense Add disabled	Business day may be closed - ask Admin / wait for next open day.
Manager delete did not remove expense	Expected - Admin must Approve the delete request.
Bulk upload category error	Category text must match an existing category name exactly (or close match as guided).
Customer not found on billing	Confirm 10-digit mobile; create as new customer if first visit.
Feedback stars blocked Done	On current release, rating is optional - tap Done without stars if you prefer.

Need more help?

Ask your salon Admin first. For platform issues, use Help & Support inside BillVyapp or contact your The Starr Kuts / BillVyapp implementation partner.

End of User Manual - thank you for using BillVyapp to run The Starr Kuts operations.
