

Complete SMS Template Catalog

For provider registration (MSG91 / Twilio / Textlocal) and DLT approval - 2026-07-27

1. Purpose

This document lists every SMS message BillVyapp needs for go-live of SMS + WhatsApp integration. Templates are derived from existing UI copy and backend OTP builders, plus recommended production-ready variants with variables for India DLT / MSG91 Flow templates.

2. Integration approach (summary)

- Keep separate channels: SmsService + WhatsAppService; orchestrate via NotificationService / Notify API.
- India default: MSG91 (SMS, DLT) + Meta Cloud API (WhatsApp). Twilio optional for global/test.
- OTP: SMS primary. Marketing/reminders: WhatsApp primary, SMS fallback.
- Do not send free-form SMS in India without matching registered DLT template text.
- UI currently simulates many sends; each template below must map to a template_id in config.

6. DLT / MSG91 registration checklist

- Register Entity + Header (Sender ID) for Transactional and Promotional separately.
- Submit each SMS-01..SMS-15 body with {#var#} placeholders as required by DLT / MSG91.
- Map approved template IDs in .env (OTP + per-flow IDs).
- OTP (SMS-01) must use MSG91 OTP API or transactional flow only.
- Promotional templates (SMS-07, 08, 09, 13) require promo header and opt-out compliance.
- Keep UI free-text notify for staff drafts; auto-sends must use approved templates only.
- Enable SMS_ENABLED=true only after OTP + Confirmation + Reminder + Receipt are approved.

7. Suggested .env mapping
